Bank Nifty

Sup 31100-30900 Res 31500-31650

- Markets had a big surge as Nifty opened gap up and closed at yet another high of 14133, gaining 114 points
- A bit of volatility was generated mid day as Nifty, after opening with big gap, plunged sharply and then recovered again to end near the day high. This caused the formation of a long lower shadow reflecting strong undercurrent. With most mid and small cap stocks showing great strength, there doesn't seem to be anything that can stop the market rally as of now.
- 14200 is the next level which the index is expected to test. Beyond that, 14280 is next resistance
- On the lower side, 14040 is immediate support. Below that today's low of 13953 act as strong support.
