### BNKNIFTY - 23092

- Even as Bank Nifty provided strong support and momentum as it topped 23000 again but Nifty displayed some volatility despite crossing 11500 early in the day. Finally it ended at 11472, gaining 5 points
- Though gaining continuously, Momentum is missing somewhat in frontline stocks while Mid and small cap stocks continue to attract huge volumes. Nifty once again bounced off the rising trendline support, closing at 6 month high but fell just short of crucial 11550 level
- Broadly the index is showing strength, only the big moves are missing. But that's okay, as long as lower support levels are not violated decisively. For the time being 11400-11300 act as crucial support level
- On the higher side, crossing above 11550, the index can even zoom to 11700 level.
