Daily Research Reports

Good Morning & Welcome to Monday's trading session at Dalal Street, dated December 9th 2024.

GIFT Nifty is struggling to keep its head above water as the trading theme still revolves around the RBI Governor Shaktikanta Das who maintained status quo on key repo rates at 6.5%.

The RBI however slashed cash reserve ratio (CRR) by 50 bps, leading to infusion of Rs 1.16 lakh crore into the banking system.

RBI has revised its CPI inflation forecast for FY25 upwards to 4.8% against 4.5% earlier as well as Q3FY25 estimates to 5.7% (Vs 4.8% earlier) and Q4FY25 forecast to 4.5% (Vs 4.2% earlier), while lowering the full year real GDP growth projection to 6.6% from 7.2% earlier.

Now, all eyes will be on India's CPI numbers which will trickle in on Thursday, December 12th.

On Friday the 13th, the WPI inflation numbers are slated to release as well.

The biggest positive catalyst for day continues to be sluggish crude oil prices at \$68 a barrel.

Long Story Short: An up-and-down session on cards.

Now, here is our preferred trade on Nifty and Bank Nifty:

Nifty (24678): Buy between 24550-24600 zone. Stop at 24111. Targets 24858/25100. Aggressive targets at 26000-26300 zone.

Bank Nifty (53510): Buy between 53000-53100 zone. Stop at 52151. Targets 53900/54467. Aggressive targets at 55000-55500 zone.

Outlook for Monday: Nifty is likely to trade choppy in an up-and-down session.

Interestingly, the morning sluggishness at Gift Nifty is despite the S&P 500 closing at its highest level ever, the Nasdaq too nabbed a new high in Friday's trade.

The positive catalyst: November US jobs report solidifies rate-cut expectations. Another rate cut in sight.

Having said that, all eyes will be on US consumer-price index for November which will be wired this Wednesday, December 11th. The US CPI still has the potential to upset bullish traders' expectations for a quarter-point rate cut.

The Federal Open Market Committee's interest rate policy decision is on December 18.

Theme: Incorporated in the year 1919, Tata Power is India's largest integrated private power company with significant international presence and specializes in generating, transmission and distribution of electricity. Tata Power is present across the entire power value chain of conventional & renewable energy and next-generation customer solutions. The company's business operations include power generation from thermal, hydro, solar and wind sources, transmission and distribution. The company also owns coal mines in Indonesia and a license for coal mining in Russia.

Tata Power's transmission & distribution (T&D) and renewable business segments are anticipated to fuel the future growth of the company. Tata Power has just won two transmission projects worth Rs. 4,600 crore while the company's renewable energy capacity stands at 10.5GW with 5.7GW of projects to be completed in next 3 years. The company's total installed capacity (including thermal power) is 15GW. Out of the Rs. 20,000 crore guided capex for FY25, 55-60% would be allocated to renewables and 30% would be for T&D.

The tailwinds are in favour of the renewables and ancillary businesses and thereby could fetch higher valuations. We expect market to ascribe higher valuation to segregated portfolio of clean energy businesses on back of a) asset light b) higher growth expectations and c) ESG compliant portfolio.

The macro environment has become favourable for clean and energy businesses which is expected to yield better valuations. The firm acquired four licenses for retail power distribution in Odisha, thereby expanding its total customer base to over 11.7mn. Tata Power, through its solar arm, has been providing 29 years of manufacturing of cells and modules by focusing on cutting-edge technology and world-class innovation. Tata Power's transition into the green segment is gaining strong momentum with nearly 40%/10% market share enjoyed by its EV charging/solar EPC segments.

Company intends to add 5.7GW of renewable energy capacities in the next three years. Management sees large opportunity from rooftop solar supported by the government with rooftop installations for 1 crore homes in next 3-4 years. The 4.3GW solar cell & module plant would be fully operational by Q2FY25. This plant would also get benefit from the large rooftop solar market.

On the EV front, with a vast network spanning highways and byways, Tata Power EZ CHARGE offers over 5,500 EV charging stations to support journeys and fleet's operations.

On the operating front, Tata Power reported a 22.4% year-on-year (YoY) rise in consolidated net profit for the quarter ended June 2023 to Rs 972.49 crore. Consolidated revenue from operations grew nearly 5% YoY to Rs 15,213.29 crore. Sequentially, the topline rose 22% and the bottomline grew by 25%.

Technical Outlook: The stock is making higher high-low on the daily/weekly/monthly chart, and is fast approaching its psychological resistance area at 500. We are sure, the scrilla bulls will dominate price action. The 200 days Exponential Moving Average (EMA) of the stock on the daily chart is currently at 407 zone.

Preferred Strategy: Establish long positions at CMP, and on dips between 375-380 zone, targeting 479/501 and then aggressive targets at psychological 550 mark. Stop below 329. Holding Period: 12-15 Months.

Maximum Call OI is at 25000 followed by 26000 strike prices. So, 25000 mark is still Nifty's major resistance zone.
